OECD-FAO Agricultural Outlook 2015-2024

Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers ...

INTRODUCTION: While new studies on the negative effects of pesticides on human health are completed each year by major government and university research centers, the majority of these studies remain "silent" in medical journals and do not reach the public via major news outlets. This reduction in public awareness appears to have worsened over the past several decades.
