Fledging is the stage in a volant animal's life between hatching or parturition and flight. This term is most frequently applied to birds, but is also used for bats. For altricial birds, those that spend more time in vulnerable condition in the nest, the nestling and fledging stage can be the same. For precocial birds, those that develop and leave the nest quickly, a short nestling stage ...

Fledglings have all or most of their feathers and leave the nest just before they can fly.. Leave a fledgling alone and watch from a distance, as the parents are usually nearby and will still be feeding the bird. Never try to return a bird to the nest as this may disturb the other young birds and may be illegal.
