the great fossil enigma pdf

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus *Homo*—and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family, the great apes. This process involved the gradual development of traits such as human bipedalism and language, as well as ...

Human evolution - Wikipedia

The classification of the great apes has been revised several times in the last few decades; these revisions have led to a varied use of the word "hominid" over time. The original meaning of the term referred to only humans and their closest relatives—what is now the modern meaning of the term "hominin". The meaning of the taxon Hominidae changed gradually, leading to a different (modern ...

Hominidae - Wikipedia

So it's just an enigma for the moment. 1.8 million years after the earliest hominins, some footsteps which are not clear enough to define for sure, only to say that they are probably some kind of ...
