Frequently Asked Questions about Logging in North Carolina. Does North Carolina have special BMPs for forest biomass harvesting?

NCFS - Logging FAQ for North Carolina - N.C. Forest Service

The spontaneous potential log, commonly called the self potential log or SP log, is a passive measurement taken by oil industry well loggers to characterise rock formation properties. The log works by measuring small electric potentials (measured in millivolts) between depths in the borehole and a grounded electrode at the surface.

Spontaneous potential logging - Wikipedia

Time logging is something I do every 3-6 months and always find some surprises in the results. I find the biggest benefit is in identifying the one area in which I have the biggest time drain.
